Summary

Self-motivated and Passionate full-stack developer with over 3 years of hands-on experience in developing scalable websites using a wide range of front-end technologies like React, JavaScript/TypeScript, CSS etc. and had solid-grip over back-end technologies like Node, Express, Mongo DB, etc. Contributing to the team's success and grasping new concepts quickly are two of my biggest strengths.

Skillset

Languages: JavaScript · TypeScript · Java · CSS ·

Technologies: React · Redux · Tailwind · Node JS · Express JS · Next JS · Mongo DB · JWT ·

Platforms: Firebase · AWS S3 · Heroku · Git · Jira ·

Work Experience

HDAO Info Systems

Bangalore / India

Full-Stack Developer (MERN)

Mar 2022 - Present

- Currently Building Fashion & Grocery E-commerce web app using **MERN** stack from the Ground up.
- It's a 8-page layout, along with 12+ sub-page e-store, features included customer-service, inventory-management for merchants, product catalogue, cart, stripe payments and mobile-responsiveness etc.

HDAO Info Systems

React-Developer

Dec 2019 - feb 2022

- Developed web-based user interactions for bakers (food e-store) & school/college managements and developed highly-responsive user interface components via Redux & React concepts.
- Converted the Class based components to React Hooks and implemented Firebase Authentication & database with reusable components.
- Optimized components for maximum performance across a vast array of web-capable devices and browsers.

Personal Projects

❖ Grilled Souls/Burger Store

- 6-page Responsive layout with Vanilla CSS.
- Firebase Authentication & Database.
- React JS (35% Class Comp & 65% Hooks).

❖ Chat app with Typescript Stack

- TRPC - Next-13 - Mongo Db - Firebase

❖ Chat Web app using MERN stack.

- Express & Mongo DB / Mongoose.
- Socket IO (Web sockets) & AWS S3
- JWT authorization

❖ Next 13 Ecommerce

- Next 13 beta file layout, Tailwind & Stripe.
