Summary

Self-motivated and passionate full-stack developer with nearly four years of hands-on experience in creating scalable websites using a diverse set of technologies, including React, JavaScript/TypeScript, CSS, Node.js, and MongoDB. Additionally, I possess a solid command of web3 technologies, such as developing Smart Contracts using Solidity, Hardhat, and Web3 JS / Ether JS. My ability to contribute effectively to a team's success and my knack for quickly grasping new concepts are two of my greatest strengths.

Skillset

Languages: JavaScript · TypeScript · Solidity · CSS ·

Technologies: React · Tailwind · Node JS · Next JS · Mongo DB · Postgresql · Hardhat · Web3 / Ether JS ·

Platforms: Firebase · AWS S3 · Heroku · GitHub · Jira ·

Work Experience

HDAO Info Systems

Bangalore / India

Full-Stack Developer (MERN)

July 2022 - Present

- Currently Building Fashion & Grocery E-commerce web app using **MERN** stack from the Ground up.
- It's an 8-page layout, along with 12+ sub-page e-store, features included customer-service, inventory-management for merchants, product catalogue, cart, online payments and mobile-responsiveness etc.

HDAO Info Systems

React-Developer

Jan 2020 – June 2022

- Developed web-based user interactions for bakers (food e-store) & school/college managements and developed highly-responsive user interface components via Redux & React concepts.
- Converted the Class based components to React Hooks and implemented Firebase Authentication & database with reusable components.
- Optimized components for maximum performance across a vast array of web-capable devices and browsers.

Personal Projects

📁 My Portfolio / Sandeep

Decent-Bet (a Decentralized Prediction Web App)

- Solidity Contract > Events > Moralis > FireStore
 - Firebase Functions > Firestore > Next JS
 - Contract <-> ThirdWeb <-> Next
- Hardhat – ChainLink Automation – MetaMask

Chat app with Typescript Stack

- TRPC – Next-13 – Mongo Db – Firebase/S3

Burger Builder/E-Store

- 6-page Responsive layout with Vanilla CSS.
- Firebase Authentication & Database.
- React JS (35% Class Comp & 65% Hooks).

Real-time Messaging app using MERN stack.

- Express & Mongo DB / Mongoose.
- Socket IO (Web sockets) & AWS S3
- JWT authorization
